I am just searching the textfile for the "value" It took me 3secs for one file. But I want to search at least 2 files in one second. (about 100 files)

Here is my code : `public class Search { public static void main(String[] args) { Search search = new Search(); String[] fileNames = search.search(); for (String fileName : fileNames) { System.out.println(fileName); } } public String[] search() { String path = "C:\\Users\\Public\\Documents\\"; int index = 0; int count = 1; String[] result = new String[200]; try { File file = new File(path + "test.txt"); FileReader fstream = new FileReader(file); BufferedReader br = new BufferedReader(fstream);`
