Sep 12, 2017 Download Windows 7 32 bits or 64 bits for free in one hour. References Category:Android (operating system) softwareQ: How to remove padding of textInput in Shiny I am trying to learn shiny. I have two UI input variables in my shiny. One for allowing users to input the furrow rate and the other is the NLP model that gets trained for furrow rate input. The first textInput makes the output of NLP output text. But the second is not getting updated when I enter data in the first input. My questions: What is that extra padding around the textInput? How to remove this? How do I get the second textInput to reflect the value entered in the first one? I am adding a bit of code of my app. ui.R fluidPage(titlePanel(title = "R Shiny App"), sidebarLayout( sidebarPanel( text 3ef4e8ef8d
