Fighters in the front, elites at the side, support on the back. In my mind that is how I would go about it, but I'm curious about what you would do differently. What would you do different in this situation. I'm working on figuring out how to make the elites have a different AI than the front line, it would be much more interesting to have different AI. I would have the elite units have the same AI as the front line, which would be in the back, and a battle group would have the same AI as the elite units, and have their own elite AI. Even then, I think the front line should always be on the attack and the battle group on the defense. Don't get me wrong, you can have battle groups taking up the rear, but I think for this sort of scenario 2d92ce491b
