there was no documentation on the internet How to get the key of the older version, not the new version. If I reinstall the older version, would i be able to take the license key of that version? I have already tried the Installation Key, but it didn't work on the new version. Attached Files: I'm installing the new version of MATLAB. I downloaded MATLAB, made a backup copy of my old MATLAB in the TEMP folder, then put the new version into the my folder. I then activated the new version. When I ran the config.m file, I got the following errors. Do I need to install the old version again and then copy it to the new version? Error: Unable to install configuration file. Type the following 'help' for commands. The configuration file is not supported. The file is present in the folder. The path is correct. Any Ideas? I have set MATLAB 2014a as my system default application using "winapp.ini" file. Now, I am having trouble to run my previous MATLAB projects in the new version. From the help menu I can see the following How do I install the older version of MATLAB to my computer so I can open my projects? I already have my MATLAB 2017a installed on my computer. I cannot understand the problem. In the installation page, I clicked on "use previous version", but it doesn't show any newer versions of MATLAB. How do I do it? Hi: There's no need to reinstall a previous version of MATLAB; the MATLAB installer will automatically find and use the previous installation when MATLAB 2017a is installed. If you have other problems, you might find it helpful to post a question on Mathworks
