GF ist . 12 . At a remote cabin on a lonely highway, a man (PAUL BUNYAN) and his mule (RANDY ROSS) must face the most terrifying moment of their lives when a maniac (GTA V) shows up with an insane plan to steal the cabin and bury them alive. The development of this game platform is really astounding. The work of the developers/programmers is really high quality and the work as a whole is just great. The trailers looked amazing, the game looks amazing. I hope more GTA games are released like this. I'm really looking forward to the release of V2.0 Let's begin with some general comments about the introduction of a custom skin pack for GTA V. I believe that it is a good way to improve the quality of the game. However the introduction of the R* club license seems to be very strange. This work is not the work of the public, because everything is not open to anyone, while only few people can use the scripts to import their own skins. People who desire a custom skin can buy it and use it at their will, but those who are not a part of the R* club will not be able to use it. This is not the way to release this kind of software and only renders the R* club meaningless. The introduction of the R* club is very unreasonable because it must be used only by a limited group of people who are familiar with the source codes and the game logic. This is not equal to the introduction of a toolkit which allows the whole GTA V players to use it. I believe that this approach was a bad strategy, so I, as well as many other GTA V players, would like to ask you to reconsider the introduction of the R* club
