## System Requirements:

Recommended: A tiling window manager like Awesome, Window Manager, i3, etc. is highly recommended. MATE or Xfce are recommended over Gnome. There is a bug in some older versions of TensorFlow where the GPU kernel would simply fail to allocate memory, causing the compute job to fail. This was fixed in TensorFlow 2.0. All versions of TensorFlow prior to 2.0 are legacy code, and they do not scale well for many tasks. Installation:
