OphirSoft - V1.0 -
Image Clipboard is an application that displays a thumbnail image of the image or text in your clipboard. The program can be installed on Windows XP, Windows Vista, Windows 7, Windows 8, Windows

8.1, Windows 10. All it takes is a single mouse click. The software is extremely simple to use, making it a powerful tool for taking a screenshot of any webpage on the web. Image Clipboard

Description: AllPlaces - 0.9 - AllPlaces is an online virtual map

system. 1. The application has an interface that resembles the map of the globe. 2. The items to be displayed on the map can be dragged and dropped anywhere on the map. 3. The map can be displayed on a Windows desktop. 4. The map can be opened

in any browser, on any computer. 5. It is easy to send map requests and share content on Facebook and Twitter. 6. The map can be scrolled. 7. In spite of the fact that the map is based on Google Map data, the map can be viewed on a Windows device. 8. In spite of the fact that the

map is online, it does not work if the Wi-Fi connection is lost. 9. The map can be printed. 10. The map can be recorded. 11. The map can be displayed on TV and mobile devices. 12. The map can be exported to PDF. 13. The map can be exported to EPS. 14.

The map can be rotated.

15. The map can be viewed in 3D. 16. The map can be searched for locations by place name.

17. The map can be searched for places by place code. 18. The map can be searched for places by ZIP code. 19.

The map can be searched for places by

city name. 20. The map can be searched for places by area name. 21. The map can be searched for places by state name. 22. The map can be searched for places by postal code. 23. The map can be displayed in full screen mode. 24. The map can be displayed in a single

window mode. 25. The map can be displayed on a map of the world. 26. The map

Mouse Simulator
(Single)Publisher's
Description This
program turns your
computer mouse into a
mouse with a keyboard
emulation software that
turns your mouse into a

keyboard. If you are a fan of keyboard macros or keyboard click macros, but find the mouse more comfortable to you, then this mouse emulator is what you're looking for. It's much easier and more comfortable to type a mouse macro in a text editor with your

keyboard than to move a mouse to your mouse emulator window. When you're done, close the keyboard emulation window and simply launch the Mouse Simulator to enjoy the full range of its capabilities. It has a customizable shortcut key for mouse button

emulation. You can change its shortcut keys. The program is free of restrictions. You can use it as much as you like. The simple, small and very easy-to-use application lets you activate your left mouse click from the keyboard. All you have to do for the program to work is

launch it. You'll then be offered the option to use the Caps Lock button instead of your left click mouse

button.KEYMACRO

MOUSE SIMULATOR

Simple, small, easy to use. What are you waiting for? [Mouse simulator] Starting from the [2] button; You can start or stop by pressing [Caps] or [Ctrl] Key. [Select button] Your mouse click is activated by pressing [2] Key. The

mouse click distance is adjusted automatically.

[Settings] Toggle the virtual mouse by pressing [Ctrl] + [Caps].

Mouse simulator: When you set up Mouse simulator, if you press the [Caps] key or [2] key, the mouse pointer in the simulator will be turned off. But it is set

by default. Mouse simulator: As you can see, the distance is adjusted automatically, so it is important to change the distance manually. Mouse simulator: The keys are also supported. Mouse simulator: You can move the mouse cursor as you like. If you want to start

the game, you need to press the [Caps] key to start the game. Mouse simulator: You can change the mouse sensitivity. The default sensitivity is set at 1.2. If you need a higher sensitivity, you can change it to the current value. Mouse simulator: You can set whether to

change the sensitivity with every key press or only when the [Caps] key is pressed. Mouse simulator: If you press the [Tab] key, the mouse pointer will be aligned to the second button.

Mouse simulator: If you hold down [Shift] and press [Caps] or [Ctrl], the mouse pointer will

be aligned to the first button. Mouse simulator: If you press [Shift] and hold down [Shift] and press [Caps] or [Ctrl], the mouse pointer will be aligned to the right button. Mouse simulator: You can save the last mouse position by pressing [Ctrl] + [Save]. Mouse simulator: The

same key can also be used to launch the game.

Mouse simulator: You can set the current mouse position by pressing [Ctrl] + [Click].

Mouse simulator: The key [Esc] and [Alt] can also be used.

Mouse simulator: You can also change the color by pressing the [Ctrl] key.

Mouse simulator: When you press the [Caps] or [2] key, the mouse pointer will become red.

Mouse simulator: The default mouse color is blue. Mouse simulator:

You can change the color easily. Mouse simulator: You can set the mouse sensitivity by pressing [Ctrl] + [Mouse

Sensitivity] key. Mouse simulator: You can change the sensitivity of the mouse. The default value is set at 1.2. Mouse simulator: You can change the mouse sensitivity by pressing [Ctrl] + [Mouse Sensitivity]. Mouse simulator
