### What's New In Typed Query - Code Generator?

View schema You can view the schemas created for the project by simply executing the `tsc -v` command, which should display a list of all your schemas. `sh tsc -v` ##

Description The Typed Query Code Generator is a simple tool aimed at assisting you in executing your database queries in PostgreSQL or SQL Server. Once the connection is configured and started, the application enables you to browse the database contents, load tables and view the code for each schema. Starting a new connection is very easy, since a syntax example is provided. The tools used to generate code are specified in the `[TypedQuery.json]` file. This file defines the various schemas generated by the `[TypedQuery.json]`
