Q: Icons in a Notepad++ File Search I'm trying to setup a search configuration in Notepad++ that starts with the word 'f_' and then looks for any folder that

contains the word 'r_' in it. That is, a search for 'f_r_folder' would look in any folder that contains both 'f' and 'r' in it. Is this possible?

A: Try this: Open notepad++ Go to menu Edit - Replace... Then paste in search pattern Search for regular expression which is `^f_\w+$` - start of the string `f_` - any characters what you typed before `\w+$` - any characters what you typed after So, for example `f_ghjk` - will match only those files which have `f_` and `ghjk` in them, but not `f_rabc` or similar. The present invention relates to a data processing method and apparatus for use in

How do I change the marker spacing on a line chart? I am asking this because this chart looks really unnatural to me, if I had to guess, it's something to do with the spacing between the circles or squares (spaceship) but I can't seem to change it. A: Working Example If you set the width of the SVG, that will spread the content out, thus making sure the spacing between markers is much wider. .line { width: 200px; } From the looks of your snippet, you do not have a max-width set (you will need to put it so that the SVG stretches to cover the entire element). Q: Need help optimizing a 3 table join in SQL Server 3e33713323
