[Relationship between Body Mass Index and Ischemic Heart Disease-Related Complications in Patients Who Had a Recent Acute Myocardial Infarction]. Obesity and ischemic heart disease (IHD) are two important problems in modern societies. This study was aimed to investigate the effect of body mass index (BMI) on the occurrence of IHD-related complications in patients who had a recent acute myocardial infarction (AMI). This study included 936 patients who had had an AMI between May 2010 and April 2014. Body mass index was computed from information on age, sex, medical history (hypertension, diabetes, hypercholesterolemia, smoking and alcohol consumption) and past medical history. The follow-up was for 22.2±13.1 months. The mean age of patients was 57.2±10.7 years and the male/female ratio was 1.7. The prevalence of hypertension, hypercholesterolemia, smoking and alcohol consumption were 51.5%, 52.3%, 21.6% and 27.7%, respectively. The means of BMI was 27.5±4.2 kg/m2. The mean BMI in the cases (with IHD-related complications) was 28.9±4.9 kg/m2 and this was higher than that of the controls (with IHD-related complications) (26.5±3.7 kg/m2) (p=0.001). The incidence rates of IHD-related complications, including atrial fibrillation (AF), acute pulmonary edema (APE), heart failure (HF) and stroke were 5.3%, 11.6%, 1.3% and 1.6%, respectively. On multivariate analyses, BMI≥30 kg/m2 was an independent risk factor for IHD-related complications. The mean BMI in the patients with IHD-related complications was 28.9±4.9 kg/m2 and this was higher than that in the control group patients (26.5±3.7 kg/m2) (p=0.001). BMI was an independent risk factor for IHD-related complications. It is recommended that BMI is evaluated routinely after AMI and that intervention programs including dietetic and exercise programs are started in patients with high BMI.Q: How to specify multiple route with `components` and `async` while rendering all of them I have a function

ADL Launches List of Top Jobs With the Least Employee-Friendly Culture Share This Article American Jewish Committee (AJC) reported late last month that the American Jewish Committee’s Anti-Defamation League has listed the worst corporate cultures in the United States, as judged by the employer according to the ADL’s criteria. Top among these companies, the ADL said, was Amazon. “Amazon is at the top of the list for the fifth time,” the ADL said, “for employing a workforce that is openly hostile toward its Jewish and pro-Israel employees.” In fact, Amazon’s anti-Semitism is legendary. In 2006, the company’s own research found that over eight percent of its Jewish employees claimed that they were discriminated against in some way. Then, in 2009, Amazon’s senior vice president for human resources found that “many managers and coworkers have strongly negative views of Jews and other religious groups.” “Just last week,” the ADL said, “Amazon workers on social media shared photos of signs advocating genocide against Jews.” [also in ADL 2017 list of “worst corporate cultures”: Walmart, Apple, Yahoo!, Facebook, and Monsanto] For Walmart, the job of parading as the grand champion of employee rights has hardly been an easy assignment. In 2017, Walmart’s Hallmark Program was discovered to have been illegally exporting products to countries known to suppress their unions and to be harmful to their workers. Walmart’s response was to promise an internal investigation. Instead, it showed up in a court room in August, 2017, with a complaint accusing its supplier of labor violations. In early June, Walmart suffered an image blowup when a black female former employee told the world of Walmart’s discriminatory practices. “The first time I went into the room with a manager,” she said, “I immediately felt like I was staring down the barrel of a gun.” “I was dealing with angry managers, so much pressure,” she said. “I tried to explain to them I wasn’t being defiant. I was being respectful and wanted to do the right thing.” In June, when the investigation into her complaint had been completed, she was sent to a disciplinary manager
