He emailed me within hours of reading my email. I was surprised by this and delighted, because 1) I’m a bit of a slob, 2) I don’t always check my email (I’ll be honest), 3) I’m a little bad at email and 4) email doesn’t do much for me, so being impressed by his energy is a bit of a surprise, especially because it came so quickly. And it has been confirmed that he has enough qualifications and is good at what he does. That’s pretty much it. The rest is me convincing myself that I am a good person.2. Glade is a graphical design system plugin for GDS-II, EDA CAD systems, and other graphical design data systems with a compatible import and export format. It provides a uniform file format and a unified graphical user interface for the different design data formats supported, including all the various free and commercial GDS-II standard formats available. It supports the EDA CAD industry standard EDIF (Euro-EDIF standard), the US part EDIF (used by EDN or FLOW32), and the DRC (Design Rule Check) format. The plugin also supports EDIF and text-based GDS-II extensions such as OASIS, so you can work with it in the same way you work with GDS-II files. You can load and save files in any format that Glade supports, as well as import and export an unlimited number of files into and out of the application. Once you have the latest version of the Compuware Cloud Service Manager 6.0 installed on your computer you'll be able to access the web UI on your current PC. With this, you'll be able to manage any of your registered cloud services. No need to register any external devices - you can use this tool to manage your Compuware Cloud Services (e.g. Compuware PowerCenter - EMS, Power Center, ECMS, PowerData Manager) and endpoints (e.g. PDC, PDC2, Storage PDC, Storage PDC2) from your current PC. Note: this is the web UI and the technical user interface are in two different versions - such as this is the case in general for the Compuware applications, such as Compuware PowerCenter, Compuware PowerCenter for Commodity Trading (ECMS), Compuware PowerCenter for Risk Management (EMS) and Compuware PowerCenter for Energy and Utilities (PEM).
