The desktop version of Photoshop is considered the standard version but there are also a number of portable versions including Apple's Photo Stream, which uses the iPad's built-in camera and camera app; the new iPad's camera feature; and an Android version from Google. Each of these uses the Lightroom (www.lightroom.com) or Picasa (www.picasa.com) features, although they are not compatible with one another. Photoshop software Up until version CS4, Photoshop was supplied as a single package that included all the standard tools and plug-ins required for editing images. Starting with the CS4 release, the software has been split into three different packages: Photoshop Creative Suite 3 (the default "trial" version), Photoshop Creative Suite 4 (the standard version), and Photoshop Creative Suite 5 (the premium version). The three versions differ mostly in the fonts that are bundled in with them. If you are supplied with a copy of Photoshop CS4, you will receive three components: Photoshop CS4 (the default trial version), Photoshop CS4 Premier (the standard edition), and Photoshop CS5 Extended. Although the creative suite edition looks similar to the premium one and is compatible with all the features (you can see how they look in Figure 6-1), they are separate applications. Photoshop is available as a trial version (free) to purchase, and to get a 30-day trial, visit www.adobe.com/creativecloud/photoshop (or look for the Photoshop Cloud App on your computer). The different versions of Photoshop have a similar approach to editing, although the earlier versions can be tricky to use at first. With each version, you can access the full image editing options — one aspect of Photoshop that makes it so powerful. However, this full-potential approach can often obscure features, so it's good to know which features are available in each version. Photoshop CS5 is so large that it may take your computer months to operate, so you need to monitor the size of the image files you are working with. You can easily find out by opening the Photoshop CS5's Help menu, clicking About Photoshop, and looking at the File Size and File Type stats. To help you get to know Photoshop, you can navigate around the program with the following keyboard shortcuts (obviously, these don't work with the mobile versions): Shift+Ctrl+A (Shift+Control+A) selects

Arguably, Photoshop and Elements are the most popular graphic design software applications out there and they have helped people create just about everything from marketing materials to movies, to popular websites. Although the application can be expensive and take a long time to learn, it can be a powerful tool when used by skilled hands. You may only need to use Photoshop or Photoshop Elements on a daily basis, but there are a lot of ways that you can use it to create some pretty cool stuff. Some of these projects will get you the most renown and others will just be fun projects. Read on for 12 ways to use Photoshop and Elements on a daily basis. With Photoshop, you can create these things... 12 Awesome Ways to Use Photoshop to Create Cool Stuff 1. Photo Manipulations By working with the Basic Palette tool, you can add and remove color from an image. A combination of things like the type of layer you've created, the blending mode and whether to use transparency will determine what happens to your image. You can create a mask that allows you to see through an image and select areas of that image. You can also pull areas of different colors from a selected image using the Magic Wand. Once a specific area is selected you can apply a specific adjustment or even add a new layer to it. You can create complex 3D effects by using Photoshop's 3D features. Basically, you'll add a perspective and set the view. From there you can duplicate or delete the layer, as well as adjust its color, opacity and blending mode. If you want, you can use the Warp tool to reshape layers. With Photoshop's Lasso tool, you can grab specific parts of your images and perform actions like trimming or selecting. You can use the Paint Bucket tool to add a new layer, and then you'll be able to fill it with the color of your choice. You can even use the Liquid Rescale tool to create blurry effects. You can easily edit almost any aspect of an image. With the Clone Stamp tool, you can create a copy of a selected area or image. You'll usually start with a layer, so you can create a copy with the Selection tool. You can also use the Shadow/Highlight tool to add or remove areas of your image that are bright or dark. You can also use the Gradient tool to create a linear gradient or radial 05a79cecff

This invention relates to methods and apparatus for treating fluids, and more particularly, to methods and apparatus for treating fluids in which solid materials are removed from the fluid. All fossil fuels eventually become depleted. Even the most fossil fuel rich regions of the world are presently mined to the extent that they are no longer economical to mine or transport to market. What is needed is an economical process for increasing the supply of fossil fuels, especially in regions which are rich in fossil fuels. Bio-methanation is the biological conversion of renewable, normally solid, biodegradable organic materials, such as agricultural residues, animal manure and municipal solid wastes, to produce methane gas. The process requires the presence of microorganisms and the reaction to be carried out at a sufficiently elevated temperature for sufficient time for the microorganisms to utilize the biodegradable feed materials, thereby converting them to products that can be further degraded, such as methane gas. The volatile gases are released into the atmosphere without being a pollutant to the atmosphere, unlike fossil fuels. This invention relates to apparatus for anaerobically treating a fluid, particularly a fluid in which solid materials are suspended. The solid materials are removed from the fluid during the treatment of the fluid in a stage such as a settling stage. The apparatus comprises a vessel that defines a treatment chamber, and a conduit that conducts the fluid into the vessel and removes the fluid from the vessel. The apparatus is operated so that solid materials from the fluid contained in the chamber are removed. This invention relates to apparatus for anaerobically treating a fluid, particularly a fluid in which solid materials are suspended. The solid materials are removed from the fluid during the treatment of the fluid in a stage such as a settling stage. The apparatus comprises a vessel that defines a treatment chamber, and a conduit that conducts the fluid into the vessel and removes the fluid from the vessel. The apparatus is operated so that solid materials from the fluid contained in the chamber are removed. A portion of the apparatus is submerged in the fluid, and an upwardly facing portion of the vessel walls defines an annular space that surrounds the submerged portion of the apparatus. A baffle is positioned in the annular space, and extends laterally outwardly from the apparatus. When the fluid moves through the conduit, it pushes the baffle upwardly. The upwardly directed fluid force causes the baffle to rotate, which in turn causes the particles of solid materials to be removed from the fluid by the upwardly directed force of the fluid. This

Please enable Javascript to watch this video MEMPHIS, Tenn. — The same slogan that became a battle cry against the city's entire political leadership is now being championed by popular Memphis Councilwoman Myra Thompson. "If you want to see a Memphis made over, start here," Thompson says. "We know how to make Memphis better, we know how to make it stronger and we know how to make it a better city. We want to live in it and we want to work in it and we want our children to live in it, and we want them to have what we have." The "make over" is happening in the city's parks system. Memphis Forward, a reform group run by a former Memphis City Council member, launched a program to hire and train community members to be city parks workers. The idea came from Jayne Casey, a soccer mom who says she wanted to instill in her children a love of the city, but felt the public parks had fallen into disrepair. "My kids love to play in the park, but not in the areas that were safe," says Casey. She says they decided to start with crime and vandalism prevention and added the parks director and a team of worker-council members to help turn the program around. "When I heard about this new program, it felt like how we needed to jump start and recognize what the problem was here, it became really clear to me," said Casey. The councilwoman knows it's a daunting task to compete with a well-established city with the backing of an organization as large as the D.C. Alliance, but she says she's confident in the program's potential. "There's a lot of new leadership in Memphis right now, and with that comes a lot of enthusiasm and energy and lots of things that we haven't done before," Thompson says. "All of us have a lot of things to learn and we're not afraid to do that, and that's why we're here, to make a difference in our community." The
